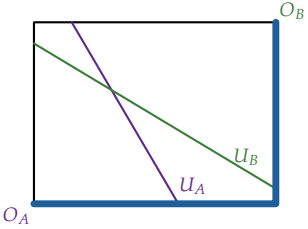
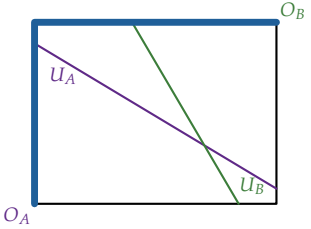
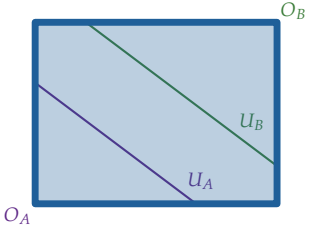
(1a) Sustitutivos perfectos, $RMS^A > RMS^B$



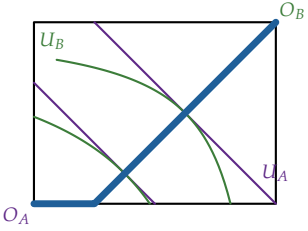
(1b) Sustitutivos perfectos, $RMS^A < RMS^B$



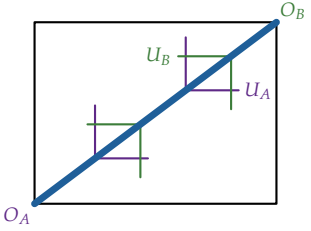
(1c) Sustitutivos perfectos, $RMS^A = RMS^B$



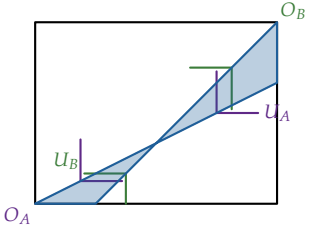
(2) Sustitutivos perfectos (A) y convexas (B)



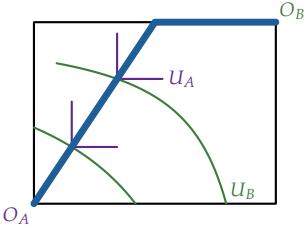
(3a) Complementarios, vértices en la diagonal



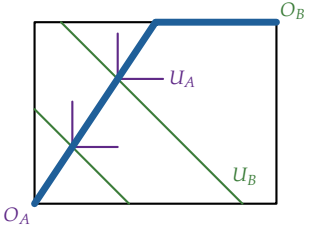
(3b) Complementarios, rayos de vértices distintos

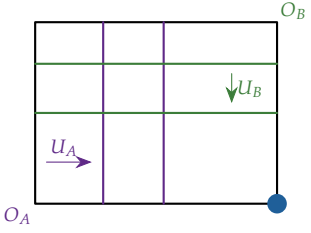


(4) Complementarios (A) y convexas (B)



(5) Complementarios (A) y sustitutivos perfectos (B)





(6) Bienes distintos: a A solo le gusta X, a B solo Y
