
$\gamma_N$
$L'_I > L_I$: sube la tasa (efecto escala)
$\eta_I L'_I$
Romer ($\phi = 1$)
$\eta_I L_I$
$\frac{\lambda n}{1-\phi}$
senda: $\gamma^*_N = \lambda n/(1-\phi)$
$L'_I$
Jones ($\phi < 1$)
efecto nivel
0
$N^*$
$N^{*\prime}$
